

Take back control of your cashflow

Flexible new finance for the changing world of pharmacy

Across the world the pharmacy sector is facing the same disruptive forces:

- Strains on public health budgets.
- Aging populations.
- Decreasing capacity in public health services.

Couple this with changes in central funding models and global economic headwinds, and you'll understand how pharmacies everywhere are facing an exceptional set of business challenges.

But opportunity also exists, as more people seek wider healthcare services locally, independent community pharmacies are ideally placed to meet their needs.

It is the federal government's goal to encourage pharmacies to diversify and adopt additional services like vaccination, to ease the burden on GPs. So, despite upheavals such as the change to 60-day dispensing, some great opportunities have emerged for entrepreneurial pharmacists. Whether you are looking to take back control of your cashflow to seize this moment for growth or to modernize your business, you will require substantial investment.

That's where TradeBridge come in. We provide **up to 10X your weekly PBS income** in additional funding, to help you meet your customers' evolving needs and build your business.

"This facility has been built from the bottom up specifically to meet the needs of our sector. It is designed for pharmacy."
